MEMBERSHIP QUESTIONS

How do I upgrade my membership?

If you would like to upgrade your membership to one of our Gold or Silver packages, click on the "Upgrade" link located on the top right side of each web page on the site. To learn more about our premium membership prices or to order, you can also click here for our order form.

How much is this?

Membership pricing can be obtained by clicking on the Upgrade link at the top right of every page of the site. You can select the plan which best suits your needs! Our Gold and Silver membership options will give you limitless access to the largest database of real people who want to hookup now.

What shows up on my bill when I upgrade?

The billing descriptor will be discreet and will not indicate membership in any specific website. The descriptor is usually the name, website, or phone number of the billing processor (depending on which biller you signed up through).

Click here for our billing support page.

You won't send me anything in the mail, will you?

The only correspondence you will receive from us will go to the email address you have registered on the site.

I have a question about my bill.

You can access our billing support page by clicking on the red link labeled Billing Support on the bottom right of any page in our website. Here you can get basic support information as well as contact info for your biller in case you wish to contact them directly. If you still have further questions you can contact us via the Contact form which you can access using the link in the upper right portion of any page in our site.

Will my Upgraded Membership renew automatically?

For your convenience, the billing provider will automatically renew your membership when your initial subscription term expires unless you cancel prior to that date. If you paid via mail order your membership will NOT renew and you will need to send another money order two weeks prior to your expiration date to avoid any interruptions in your service.

How will I cancel once I become a member?

After you have successfully obtained a membership to the site, you will receive a confirmation email from the billing provider. You can contact them at anytime to cancel your membership. If you lost your billing information, we should be able to assist you.

If I decide I don't like my membership can I get prorated?

Memberships cannot be pro-rated. If you cancel after your first month, your membership will remain active for the remainder of your initial term.

My credit card is good and you're not accepting it!

1. Is your credit / debit card number correct?
2. Is your credit / debit card expired?
3. Have you exceeded your credit limit?

It is also possible that our billing provider has received charge backs or fraudulent subscriptions from other members of your bank or the credit card number you supplied and has ceased doing business with them.

If you continue to have problems try choosing one of the alternative payment options by clicking on the "Alternate Payment Options" link on the upgrade page.

WEBCAM / VIDEO CHAT - GETTING STARTED

Can I use the Video Chat if I don't have a webcam?

You do not need a webcam in order to view other members' videos or utilize the Video Chat.

You will need a webcam in order for others to see YOU.

The best part of using the Video Chat is that you can see others and they see you, so consider buying a webcam if you don't already have one.

More live webcams in one room equal more fun for everyone.

How do I install my WebCam?

Consult the instruction manual that came with your webcam for specific instructions on how to correctly install your cam to your computer.

All you need in order to access the Video Chat is the most current version of Macromedia Flash (this is a free software download).

After you have downloaded flash you should have no problem joining the Video Chat.

Click on Video Chat and then select the room you want to join. If your cam is plugged in correctly you will be asked if you would like to broadcast your video stream at this time, select "yes".

When you enter a room you should see a local webcam stream in a smaller window. If you do not see this, then your webcam is either inactive, in use by another program, not functioning properly, or not currently selected as your video input source for the flash player. There is also a possibility that you are behind a firewall device that might be preventing a proper video and/or chat signal with the servers.

When you enter a video chatroom click on "Actions" and then "Open Local Webcam Settings", check and make sure that the correct camera is selected.

How do I right click if I'm using a Mac?

Right clicking on a Mac can be achieved by:

1. by hitting shift+click or option+click

Any mention of a 'code', 'key', 'key-code', 'membership ID' or 'membership ID number' is part of a FRAUDULENT SCAM used by CRIMINALS to obtain your credit card or other financial information, or to obtain your XXXBlackBook.com account to perpetuate this type of FRAUD.

WEBCAM / VIDEO CHAT - TECHNICAL PROBLEMS

Why isn't my DV cam working?

A DV cam is at a resolution that is greater then what the Video Chat allows.

You will need a Webcam in order to use the Video Chat.

I'm not sure I downloaded flash successfully.

Click this link to make sure flash was correctly downloaded onto your computer.

My browser keeps crashing each time I enter the Video Chat.

Make sure you have the latest version of your Internet browser. Installing a new browser can often repair issues with browser crashes.

My webcam isn't working.

When you enter a room you should see a local webcam stream in a smaller window. If you do not see this, then your webcam is either inactive, in use by another program, not functioning properly, or not currently selected as your video input source for the flash player. There is also a possibility that you are behind a firewall device that might be preventing a proper video and/or chat signal with our central computers. When you enter a chat click on Actions and then Open Local Webcam Settings, check and make sure that the correct camera is selected.

My webcam is working but I can't see anyone else.

If you are seeing your own video stream in the lower left corner then your cam is installed correctly and you should have no difficulties seeing other user's cams. It is possible that the members you are trying to view chose to not allow their web stream to be broadcasted during this particular session. Try clicking on someone you might not normally want to view in order to make sure that's the problem. To open a user's cam in one of your windows, click the lock symbol to unlock it and then click on the user's name that you want to appear in your window.

I'm having problems entering text into the Video Chat.

To enter text while in the chat hit ENTER on your keyboard. If you are doing this and are continuing to have problems try clearing your cache. To do this click Tools, internet options, delete files, delete all offline content. You can also try using the Enter key on your number pad.

I'm trying to open profiles through the Chat Actions menu and it won't work!

Make sure that you don't have any popup disablers turned on.

The view profile link in the chat prompts a popup window in the chatroom with the users profile information on it.

This information will not show up if you have a Popup Blocker turned on.
